

MORPHEUS8 *body*

Microneedling

**BREAKTHROUGH
RADIO FREQUENCY ENERGY
MICRONEEDLING TECHNOLOGY**

Tightens skin, smoothens texture and reduces fine wrinkles

Improves appearance of scars and builds collagen

Melts subcutaneous fat

MORPHEUS8 *body* microneedling utilizes the latest Fractional Radiofrequency technology to tighten skin, smoothen texture and decrease fine wrinkles. Morpheus8 penetrates 8mm into deep skin layers to stimulate collagen and elastin production. Both these proteins are responsible for creating soft, smooth, taut, youthful skin.

MORPHEUS8 *body* is used to selectively melt subcutaneous fat on the abdomen, legs, back, arms, and flanks.

MORPHEUS8 *body* stimulates collagen production thereby improving skin appearance and traumatic and surgical scars.

A series of three treatments spaced 4-6 weeks apart, is recommended for optimal results. Morpheus8 is often combined with other body contouring procedures such as Dermal Fillers, BodyTite, and Laser Liposuction to enhance results.

FREQUENTLY ASKED QUESTIONS

WHAT AREAS CAN BE TREATED?

MORPHEUS*body* can treat the skin over any body area, though it mainly focuses on the abdomen, décolletage, legs, back, arms, and flanks. Morpheus8 tightens loose skin, reduces wrinkles, improves skin appearance, diminishes scarring, and melts unwanted underlying fat.

IS THE PROCEDURE PAINFUL?

MORPHEUS*body* is a well-tolerated in-office procedure. By using "laughing gas" and topical lidocaine cream, there is minimal discomfort with prompt recovery.

WHAT IS THE DOWNTIME?

You may resume most activities immediately, though we recommend avoiding the sauna or intense workouts for 24 hours. Mild swelling, redness, small scabs, or minor bruising may be seen for up to 5 days. You should avoid direct sunlight and tanning booths for 2 weeks post-treatment.

We recommend applying Intensive Recovery Cream to hydrate skin and minimize redness, as well as applying daily sunscreen to protect your skin and preserve results.

WHEN WILL I SEE RESULTS?

Most patients will see improvements within 10 days and notice continued improvements over the next 4-6 weeks.
