

MORPHEUS8 Microneedling

BREAKTHROUGH RADIO FREQUENCY ENERGY MICRONEEDLING TECHNOLOGY

- Improves fine wrinkles and lines on the face and neck
- Improves skin texture, reduces pores, and builds collagen
- Melts fat, reduces sagging skin and jowls
- Improves acne scarring

MORPHEUS8 microneedling utilizes the latest Fractional Radiofrequency to tighten skin, reduce wrinkles, and improve complexion. This technology penetrates 4mm into deep skin layers to stimulate collagen and elastin production. Both these proteins are responsible for creating soft, smooth, taut, youthful skin.

MORPHEUS8 is also used to selectively melt subcutaneous fat on the face and neck, such as the jowls and the double chin.

MORPHEUS8 remodels acne, traumatic, and surgical scars by stimulating collagen production.

A series of three treatments, spaced four to six weeks apart, is recommended for optimal results.

MORPHEUS8

FREQUENTLY ASKED QUESTIONS

WHAT AREAS CAN BE TREATED ?

MORPHEUS8 targets the face and neck. It tightens loose skin, reduces wrinkles, smoothens "smokers lines" around the lips, diminishes scarring, tightens pores, melts unwanted fat and improves complexion. This minimally invasive technology can be extended to the décolletage and breasts to decrease "crepey" skin, stretch marks, surgical scars and skin damage. Morpheus8 can also melt subcutaneous fat in the jowls, double chin, and bags under eyes.

IS THE PROCEDURE PAINFUL ?

MORPHEUS8 is a well tolerated in-office procedure. By using "laughing gas" and topical lidocaine cream, there is minimal discomfort with prompt recovery.

WHAT IS THE DOWNTIME ?

You may resume most activities immediately, though we recommend avoiding the sauna or intense workouts for 24 hours. Mild swelling, redness, small scabs or minor bruising may be seen for up to five days. You should avoid direct sunlight and tanning booths for two weeks post treatment.

We recommend applying Intensive Recovery Cream to hydrate skin and minimize redness, as well as applying daily sunscreen to protect your skin and preserve results. You may apply makeup two to three days after your treatment.

WHEN WILL I SEE RESULTS ?

Most patients will begin seeing improvements within ten days, and continued improvements over the next four to six weeks after the procedure.
