Dr. Emran Imami does a non-surgical facelift procedure at his office in Melbourne. *Provided*

The gift of turning back the clock is one no one will return or regift.

Facing the new year, and all of its same-old routines, will definitely feel much better with a new face that eschews the passage of time. While a traditional facelift could accomplish that feat, a nonsurgical option is gentler, easier and less expensive.

It could well be the gift that keeps on giving, whether you give it to someone you love or splurge on it for yourself.
