

MYELLEVATE®

NON SURGICAL JAWLINE CONTOURING AND NECK LIFT

Lifts the neck and sharpens the jawline

MYELLEVATE® is a minimally invasive facial rejuvenation solution that refines the lower face, jawline and neck with natural looking and long lasting results. MyEllevate uses suspension threads to gently lift the neck, eliminate neck bands and sharpen the jawline.

A continuous permanent suture physically elevates and supports the skin and underlying tissues along the jawline for a sculpted look lasting over five years.

MYELLEVATE® is incorporated in our Signature Non-Surgical Face and Neck Lifts.

FREQUENTLY ASKED QUESTIONS

IS THE PROCEDURE PAINFUL ?

MYELLEVATE® is a well tolerated in-office procedure. By using light sedation, "laughing gas" and lidocaine, there is minimal discomfort with prompt recovery.

WHEN WILL I SEE RESULTS ?

Most patients will see immediate results, with best results noticeable after six to eight weeks.
